Patio Style Insulated Kennel

AUSTRALIAN MADE

100% EPS-FR Insulated Dog Kennels

“ Kennels built using timbers or plastics often need replacing due to damage from chewing & scratching.

Kumfi Kennels insulated dog houses are built using insulated Colorbond panels, which will last your pets life cycle.”

Kumfi Kennels quality dog houses are designed and made to be the only kennel you will ever need to purchase.

The solid Insulated Panel design of ***Kumfi Kennels*** quality dog houses, provides you with a longer lasting product, using Colorbond panels as the main structure. The slanted roof creates a comfortable environment within. This also helps deflect the rain and direct sunlight from reaching your beloved pet.

Kumfi Kennels quality dog houses, provide shade from the heat and harsh sunlight during summer, as well as providing a warm place to shelter from the cold winds and rain during winter. The ideal housing for all weather conditions.

All ***Kumfi Kennels*** hand built dog houses are easily moved and also cater to your pampered pets natural instinct to den.

Dogs that spend time outdoors, need an insulated dog house.

Kumfi Kennels Patio Styled Insulated Kennel, has been designed for multiple purposes. Not only for patios and outdoor areas, but also with enclosed dog pens and boarding houses in mind as well.

The EPS-FR insulated panel design, ensures the maximum comfort and protection for your beloved pet. It has a hinged slanted roof for ease of cleaning and routine maintenance, side latches to help seal the roof in position and a raised floor to keep your pampered pet warm and damp free.

The insulated panels we use have an anti-bacterial coating (Colorbond Permagard), which makes it virtually impossible for bacteria to grow as long as a maintenance schedule is maintained.

Accessories are available to personalise and add additional comfort to each kennel such as: dog doors, dog beds, plywood floor & magnetic lettering.

SIZE	WIDTH	LENGTH	HIEGHT	DOOR SIZE
SMALL	500	700	510	185 x 270
